

WHAT

The branding and interior design of a new restaurant “La Tartine” in Montreal, Canada.

HOW

When we were asked to work this restaurant project, with a great food idea (bio foods) we embraced it. We created the cosy interiors and a “feel good” menu to reflect well being and community and a relaxed eating experience.

WHY

We acknowledge and understand the importance of good food and nourishment, so for us we really enjoyed working a project that combined our two passions... design and food!
